

MAX

Efficiency Savings Hot Water

Introducing the Premier® MAX Smart Hybrid Electric Heat Pump Water Heater

For maximum savings, maximum hot water and maximum tank protection, when you want the best choose Premier® MAX. Using innovative smart valve technology, Premier MAX delivers up to 40% more hot water when you need it and efficient heat pump performance all the time.

Smart Design:

- Hot Water+: For long term increased hot water delivery, this new operating mode offers three levels of boosted performance allowing end users to get up to 40% more hot water
- Guest Mode: For short term increased hot water need, this new operating mode boosts hot water output to maximum levels for up to seven days
- iCOMM™ Smart Connectivity Compatible through the State App

Exceptional Performance:

- 4X more efficient than standard electric
- Saves more than \$600 in annual energy costs
- Whisper quiet 45 dBA operation
- Cools and dehumidifies the surrounding areas

Easy Install:

- Zero clearance required on sides and back for tight spaces
- Contractor preferred top connections
- Integrated ducting adapters for confined install
